Hallo! I would like to present my model, it is first gallery in this forum. I built model based on Andrzej Haliński publishing, it is difficult due to the large number of small parts, and the shape of the trailer which is difficult to build properly. Model does not reflect the original, but it is a model of a few years. Model did a nice, a lot of elements I've done from scratch. I performed "dirty" in many parts of the model. Check out the gallery!
